### THE HI GLOBAL REGISTRY WILL:

- **Generate new insights into HI**
- **Drive new research for treatments and cures**
- **Support the success of HI clinical trials**
- **Study and guide standards of care**
- **Improve the lives of all those affected by HI**

### WHY YOU SHOULD PARTICIPATE IN THE HI GLOBAL REGISTRY

- The HI Global Registry will be your resource to better understand how the whole community of HI patients is affected by the condition. You will see how others respond to the survey questions you have completed.
- The information you input into the HI Global Registry can be shared with researchers who are dedicated to improving treatments and patient outcomes.
- When you indicate in your contact preferences that you would like to learn more about clinical trials, you will be notified when you meet eligibility criteria for a study!
- Your participation will support key collaborations between the patient community, healthcare professionals, academics, advocacy organizations and industry to bring about change.
