Overview of the Surveys

View from the main Participant dashboard:

The screenshot shows the main Participant dashboard for Harry Indigo, a caregiver. The dashboard features a sidebar with navigation options and a main content area titled 'New/In-Progress Surveys/Studies'. A table lists various surveys with columns for 'Surveys/Studies', 'Published On', 'Expiration Date', 'Time To Complete (minutes)', 'Questions', and 'Status'. Callouts point to specific elements: 'Survey name' points to the survey titles, 'Estimated time to complete the survey' points to the 'Time To Complete' column, and 'Start or continue surveys' points to the 'Status' column buttons.

A callout points to the 'COMPLETED' tab, stating 'Very similar to the main dashboard, except you can view completed surveys here'. The table structure is identical to the one in the main dashboard.

- The **Number of Questions** is not listed in the dashboard (all are listed as zero). This is because the number of questions you will be asked changes depending on your answers to previous questions. For example, if you report that you have had a pancreatectomy in the *Surgical Management* survey, you will be asked follow-up questions about your pancreatectomy. If you have not had a pancreatectomy, you will not be asked those follow-up questions.
- The **Time to Complete** is an estimated range. The actual time it takes you to complete a survey will depend on how many questions you need to answer, your reading speed, how long you take to think about your responses and how much you write for the optional free text responses.
