Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Congenital Hyperinsulinism International (a nonprofit organization) ("CHI"), which comprise the statement of financial position as of December 31, 2023, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of CHI as of December 31, 2023, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of CHI and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

To the Board of Trustees of
Congenital Hyperinsulinism International

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Congenital Hyperinsulinism International's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of CHI's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about CHI's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

To the Board of Trustees of
Congenital Hyperinsulinism International

Report on Summarized Comparative Information

We have previously audited the CHI's December 31, 2022 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated October 19, 2023. In our opinion, the summarized comparative information presented herein as of and for the year ended December 31, 2022 is consistent, in all material respects, with the audited financial statements from which it has been derived.

1. Nature of Activities

Congenital Hyperinsulinism International (“CHI”) is a nonprofit 501(c)(3) corporation dedicated to improving the lives of babies, children, and adults affected by congenital hyperinsulinism (HI). HI is a life-threatening genetic disorder that causes severe low blood sugar (hypoglycemia) in infants and children, though in 50% of patients, the genetic cause is unknown. For those with HI, the beta cells of the pancreas secrete too much insulin in an unregulated manner. Excess insulin causes hypoglycemia. Prolonged or severe hypoglycemia can cause seizures, permanent brain damage, or even death if left untreated. A good prognosis is far more likely with a timely diagnosis.

CHI increases awareness of HI to improve timely diagnosis among the public and medical personnel who have a direct opportunity to detect it, in order to decrease adverse neurological outcomes and death. To that end, CHI spreads awareness of HI with ongoing campaigns on social media, the CHI website and blog, CHI posters in 24 languages, CHI brochures, through direct mail and email, and at meetings and conferences. CHI provides educational resources and holds conferences and meetings on HI for patients, families, medical professionals, school personnel, and rare disease industry members. To date, CHI has held 31 family and research meetings and conferences with presentations from academic researchers, members of advocacy organizations, HI patients and families, and biotechnology companies.

CHI supports research and development to better understand, treat, manage, and hopefully cure HI. CHI shares the patient perspective with researchers and members of the biopharmaceutical industry to accelerate the development of patient-centered treatments. CHI is a part of the Million Dollar Bike Ride grant program with the University of Pennsylvania’s Center for Orphan Diseases; a pilot research grant is offered each year for an innovative, preclinical or clinical study with the potential to lead to a better HI treatment, a cure for HI, or improvement in the quality of life for those affected by HI.

CHI conducts the HI Global Registry (HIGR) research project. HIGR provides a convenient online platform for the HI patient community to share their experiences of living with HI. With permission from the patient families, MaxHIGR provides complementary data from the physician perspective. By participating in the HI Global Registry, the patient community helps themselves and researchers better understand HI to advance better treatments, a potential cure, and more timely and accurate diagnoses. A HIGR report is published each year by the CHI staff. Scholars and researchers may request deidentified data for their research projects.

In 2023, CHI continued to lead the Collaborative Research Network (CRN), a project of CHI dedicated to the development of faster and more accurate diagnoses, new evidence-based treatments and cures, standardized clinical guidelines, and increased and improved access to treatment, medication, devices, and supplies. This ambitious project includes working groups focused on different aspects of a prioritized research agenda (PRA) developed by the CRN's members including 55 leading researchers, clinicians, and patient advocates from 16 countries. The CRN members have been focused on the top priorities identified in the PRA: Newborn Screening (Diagnose all babies with congenital hyperinsulinism in a timely manner); Glucose as a Vital Sign (Increase awareness and timely diagnosis of HI); Care Guidelines (Create and disseminate continually evolving global care guidelines); Natural History (Build a robust registry that collects patient-reported, physician, and real-world data to provide a foundation for HI natural history); Continuous Glucose Monitoring (Create principles for Draft guidelines on CGM use in HI patients)

The first-ever international hyperinsulinism guidelines were published in July 2023. These guidelines are a collaboration of work by HI experts around the world, including many who are part of the CHI Collaborative Research Network and CHI staff. Patient and caregiver representatives of the CHI Congenital Hyperinsulinism Collaborative Research Network provided the patient perspective.

CHI continues to support the Open Hyperinsulinism Genes Program in partnership with the University of Exeter in the UK which is the first point-of-need international genetic testing service for HI that is also accelerating scientific knowledge through the creation of a self-sustaining, research gene discovery pipeline. Through December 2023, 894 samples from individuals affected by Congenital Hyperinsulinism and 630 samples from family members from 61 countries on 5 continents have been tested.

In 2023, CHI continued to support the CHI Centers of Excellence Designation. Six centers were granted the designation and recognized as multi-disciplinary clinical and research centers in the field of congenital hyperinsulinism in 2021. The goals of this program are to make it easier for patient families to access care at leading hospitals, encourage patient-focused standards at the leading hospitals, foster a pipeline of expert clinicians and researchers, and to encourage collaboration among researchers, clinicians, and patient leaders and advocates.

CHI advocates on behalf of HI families all over the world for access to quality treatment, medication, and supplies. CHI provides opportunities for affected families to emotionally support each other because the home care medical management of HI is often complicated and difficult. CHI offers online forums, and CHI staff and volunteers are available by telephone and in-person for support. CHI establishes funds at hospitals to support families from out of town who must travel to centers of excellence for patient care.

2. Summary of Significant Accounting Policies

A summary of the significant accounting policies followed by CHI in the preparation of the accompanying financial statements is set forth below:

Accounting Method

The financial statements of CHI are presented on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Basis of Presentation

CHI prepares its financial statements in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"), *Accounting for Contributions Received and Made*, and *Presentation of Financial Statements of Not-for-Profit Entities*. *Presentation of Financial Statements of Not-for-Profit Entities* establishes standards for external financial reporting by not-for-profit organizations and requires that resources be classified for accounting and reporting purposes into two net asset categories: net assets with donor restrictions and net assets without donor restrictions.

Contributions that are restricted by the donor are reported as increases in net assets without donor restriction if the restrictions expire in the fiscal year in which the contributions are recognized. All other donor-restricted contributions are reported as increases in net assets with donor restrictions. When a restriction expires, net assets with donor restrictions are reclassified to net assets without donor restrictions. In addition, the standard requires the presentation of qualitative information on how CHI manages its liquid available resources and liquidity risks. Quantitative information that communicates the availability of a nonprofit's financial assets at the statement of financial position date to meet cash needs for general expenditures within one year is required to be presented on the face of the financial statement and/or in the notes to the financial statements. *Accounting for Contributions Received and Made* requires that unconditional promises to give be recorded as receivables and revenue and requires CHI to distinguish between contributions received for each net asset category in accordance with donor-imposed restrictions. Accordingly, the net assets and changes therein are classified and reported as follows:

Net Assets without Donor Restrictions are resources representing the portion of expendable funds available for support of CHI's programs and activities. These resources are not subject to donor-imposed stipulations. Net assets without donor restrictions also include those expendable resources which may have been designated for special use by the Board of Trustees.

Net Assets with Donor Restrictions are net assets subject to stipulations imposed by donors, and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of CHI or by the passage of time. Other donor restrictions are perpetual in nature, whereby the donor has stipulated the funds be maintained in perpetuity. Donor restricted contributions are reported as increases in net assets with donor restrictions.

Congenital Hyperinsulinism International
Notes to Financial Statements
December 31, 2023 and 2022

When a restriction expires, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statement of activities as net assets released from restrictions. CHI had net assets with donor restrictions of \$35,000 at December 31, 2023 and 2022.

Revenue and Support Recognition

CHI recognizes revenue from program income when the services are provided. The performance obligation consists of hosting annual meetings and global conferences to spread awareness of congenital hyperinsulinism and provide resources to those affected in the form of program income. CHI records special events revenue equal to the fair value of direct benefits to donors, and contribution revenue for the excess received when the event takes place.

CHI recognizes contributions when cash, securities or other assets; an unconditional promise to give; or a notification of a beneficial interest is received. Conditional promises to give that is, those with a measurable performance or other barrier and a right of return are not recognized until the conditions on which they depend have been substantially met.

Disaggregation of Revenue

In the following table, revenue is disaggregated by timing of satisfaction of performance obligations for the years ended December 31:

	<u>2023</u>	<u>2022</u>
Performance obligations satisfied at a point in time	<u>\$ 901,852</u>	<u>\$ 1,071,662</u>

Revenue from performance obligations satisfied at a point in time is related to awareness raising services in the form of program income and fundraising revenue from special events.

Accounts and Contributions Receivable

Accounts and contributions receivable are stated at amounts management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a charge to earnings and a credit to a valuation allowance based on its assessment of the current status of individual accounts. Balances that are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. There was no allowance for credit losses established as of December 31, 2023 and 2022, as management deemed all accounts and contributions receivable to be collectible as of the date of the financial statements.

Allowance for Credit Losses

In June 2016, the FASB issued guidance (FASB ASC 326) which significantly changed how entities will measure credit losses for most financial assets and certain other instruments that aren't measured at fair value through net assets. The most significant change in this standard is a shift from the incurred loss model to the expected loss model. Under the standard, disclosures are required to provide users of the financial statements with useful information in analyzing an entity's exposure to credit risk and the measurement of credit losses. Financial assets held by the company that are subject to the guidance in FASB ASC 326 were accounts and contributions receivable.

CHI adopted the standard effective January 1, 2023. The impact of the adoption was not considered material to the financial statements and primarily resulted in enhanced disclosures only.

Development Costs

In accordance with FASB ASC, *Intangibles - Goodwill and Other - Internal-Use Software*, internal and external costs incurred during the application development stage to develop computer software solely to meet CHI's internal needs are capitalized. Costs incurred during the preliminary project stage and post-implementation/operation stage are expensed as incurred. Capitalized software costs are amortized on a straight-line basis over the estimated useful life of the software.

Income Taxes

CHI is an organization described under Section 501(c)(3) of the Internal Revenue Code (the "Code") and is therefore exempt from federal income taxes under Section 501(a) of the Code. CHI is also exempt under similar various state tax provisions. Accordingly, no provision for federal or state income tax has been presented in the accompanying financial statements. CHI follows the provisions of FASB ASC, *Income Taxes*. The standard prescribes a minimum recognition threshold and measurement methodology that a tax position taken or expected to be taken in a tax return is required to meet before being recognized in the financial statements. It also provides guidance for derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition as they relate to those tax positions.

CHI does not expect a significant increase or decrease to the total amounts of unrecognized tax positions during the year ended December 31, 2023. However, CHI is subject to regular audit by tax authorities, including a review of its nonprofit status which management believes would be upheld upon examination. CHI believes that it has appropriate support for the positions taken on its tax returns. Nonetheless, the amounts ultimately paid, if any, upon resolution of the issues raised by the taxing authorities may differ materially from the amounts accrued for each year. As required by law, CHI files informational returns with the United States federal and various state jurisdictions on an annual basis. These returns are subject to examination by these authorities within certain statutorily defined periods established by the respective jurisdictions.

Fundraising Expense – Special Events

It is CHI's policy to net direct fundraising expense related to special events with special event revenue. Direct fundraising expense for the years ended December 31, 2023 and 2022 was \$66,450 and \$53,604, respectively.

Functional Allocation of Expenses

The costs of providing the various programs and other activities have been summarized on a functional basis in the accompanying statement of activities. Expenses are charged to programs based on direct expenditures incurred. Any program expenditures not directly chargeable are allocated based on estimates made by management. Program costs are those related to awareness, support and research.

Management and general expenses relate to administrative expenses associated with those programs and are allocated based on salary costs, infrastructure costs, and other methods considered by management to be reasonable. The expenses that are allocated include salaries and wages, payroll taxes and employee benefits, occupancy, professional fees, office supplies and expense, telephone and technology, travel, insurance, dues and subscriptions, and bank and merchant fees, which are allocated on the basis of estimates of time, effort and usage. Program costs and materials are allocated on a direct program basis.

Donated Services

CHI recognizes contributed services at their fair value if the services have value to CHI and require specialized skills, are provided by individuals possessing those skills, and would have been purchased if not provided by contributors. If these criteria are met, the related amounts are reported as both in-kind contribution revenue and expense in the statement of activities. Volunteers (including the Board of Trustees) make significant contributions of time relative to general management and operations of CHI. The value of this contributed time is not reflected in these financial statements since it does not meet criteria for recognition under U.S. generally accepted accounting principles.

CHI follows the provisions of ASU 2020-07, *Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets* (Topic 958), which requires nonprofits to present contributed nonfinancial assets as a separate line item in the statement of activities apart from contributions of cash or other financial assets.

Donated services have been reported as in-kind revenue and expense on the statements of activities and functional expenses. Donated services for the year ended December 31, 2023 and 2022 amounted to \$0 and \$3,014, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts of assets and liabilities, revenues and expenses and changes therein, and disclosures of contingent assets and contingent liabilities and accompanying notes. It is reasonably possible that CHI's estimates may change in the near term.

Leases

The Company applies FASB ASC 842 to determine whether an arrangement is or contains a lease at inception. CHI leased office space. Operating leases that qualify are included in operating lease right-of-use (ROU) assets, other current liabilities, and operating lease liabilities on the statement of financial position.

ROU assets represent the right to use an underlying asset for the lease term and lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. The operating lease ROU asset also includes any lease payments made and excludes lease incentives. Lease terms may include options to extend or terminate the lease when it is reasonably certain that the option will be exercised. Lease expense for lease payments is recognized on a straight-line basis over the lease term.

Accounting policy election for short-term leases: CHI has elected for all underlying classes of assets, to not recognize ROU assets and lease liabilities for short-term leases that have a lease term of 12 months or less, but greater than 1 month at lease commencement, and do not include an option to purchase the underlying asset that the CHI is reasonably certain to exercise. CHI recognizes lease cost associated with its short-term leases on a straight-line basis over the lease term.

Reclassification

Certain prior period account balances have been reclassified to conform to current year presentation.

Subsequent Events

Management has reviewed subsequent events and transactions that occurred after December 31, 2023 through the date of the independent auditor's report and the date the financial statements were available to be issued, September 10, 2024. The financial statements include all events or transactions, including estimates, required to be recognized in accordance with generally accepted accounting principles. Management has determined that there are no nonrecognized subsequent events that require additional disclosure.

Congenital Hyperinsulinism International
Notes to Financial Statements
December 31, 2023 and 2022

3. Development Costs

CHI has intangible assets comprised of development costs for the Natural Histories Patient Registry Platform known as the IAMRARE Registry Platform. CHI is the sponsor of the HI Global Registry which has been on the IAMRARE Registry Platform. In November 2023, the HI Global Registry has moved to the Across Healthcare/Matrix Platform and the related development costs are included in intangible assets at December 31, 2023. The purpose of the HI Global Registry is to collect patient-reported data to better define the natural progression of congenital hyperinsulinism to drive new research for better treatments and a cure.

Less: accumulated amortization		<u>(11,875)</u>	<u>(10,000)</u>
		<u>\$ 111,476</u>	<u>\$ -</u>

Amortization expense for the years ended December 31, 2023 and 2022 amounted to \$1,875 and \$0, respectively.

4. Net Assets with Donor Restrictions

Net assets with donor restrictions are comprised of net assets restricted for an HIHA pilot grant and a grant from Global Genes for the Centers of Excellence Program at December 31, 2023 and 2022:

	<u>2023</u>	<u>2022</u>
Congenital Hyperinsulinism/Hyperammonemia	<u>\$ 35,000</u>	<u>\$ 35,000</u>

The sources of net assets released from donor restrictions by incurring expenses that satisfy the specified purpose restrictions placed by donors during the year ended December 31, 2023 and 2022 are as follows:

	<u>2023</u>	<u>2022</u>
Centers of Excellence Program	<u>\$ -</u>	<u>\$ 461</u>

No amounts were released from restriction during the year ended December 31, 2023.

5. Liquidity and Availability

The provisions of FASB Update No. 2016-14 require the presentation of qualitative information on how CHI manages its liquid available resources and liquidity risks. Quantitative information that communicates the availability of a nonprofit's financial assets at the statement of financial position date to meet cash needs for general expenditures within one year is required to be presented on the face of the financial statement and/or in the notes to the financial statements.

Congenital Hyperinsulinism International
Notes to Financial Statements
December 31, 2023 and 2022

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of the statement of financial position date are comprised of the following:

	<u>2023</u>	<u>2022</u>
Financial assets:		
Cash	\$ 1,595,342	\$ 1,510,108
Accounts receivable	64,759	110,121
Contributions receivable		5,939
Total financial assets	<u>1,660,101</u>	<u>1,626,168</u>

Less those unavailable for general expenditures within one year due to Contractual or donor-imposed restrictions:

 Restricted by donor for:

Congenital Hyperinsulinism/Hyperammonemia	<u>(35,000)</u>	<u>(35,000)</u>
---	-----------------	-----------------

 Financial assets available to meet cash needs
 for general expenditures within one year

<u>\$ 1,625,101</u>	<u>\$ 1,591,168</u>
---------------------	---------------------

CHI has financial assets on hand to meet 60 days of normal operating expenses, which are, on average, approximately \$140,000. In addition to these financial assets, a significant portion of CHI's annual expenditures will be funded by current year's operating revenues and support. CHI has a policy to structure its financial assets to be available as its general expenditures, liabilities, and other obligations come due.

6. Operating Lease

Beginning in April 2018, CHI rented office space on a month-to-month basis. The lease was terminated in 2022. CHI entered into a lease for storage space in 2023 on a month-to-month basis. Rent expense for the years ended December 31, 2023 and 2022 amounted to \$392 and \$4,828, respectively.

7. Concentrations of Credit Risk and Funding Sources

CHI deposits its cash in accounts with major banking institutions. At times, such amounts may be in excess of FDIC insurance limits. Management believes that CHI has no significant risk of loss on these accounts due to the failure of the institutions.

CHI had three sponsors for the years ended December 31, 2023 and 2022, which comprised approximately 54% and 50% of total revenue, respectively. CHI had two sponsors that comprised \$55,350 or 85% and \$107,684 or 93% of receivables at December 31, 2023 and 2022, respectively, all of which were timely collected. As reflected in the Statement of Activities, CHI does receive substantial support from fundraising and contributions from individuals, corporations and foundations. Although no funding source is guaranteed, CHI believes that based upon past history and the continued monitoring of the diverse funding sources by management there is not a significant risk to the agency's funding streams in total.

December 31, 2023 and 2022

8. Commitments

In July 2023, CHI entered into an agreement with the European Health and Digital Executive Agency (the “Agency”) for grant funding to perform research in line with CHI’s mission as a part of the LightCure Consortium. The Agency awarded \$1,642,688 that will be paid in multiple payments over the five-year grant period, beginning January 1, 2024. The funding is contingent on compliance with budgetary, spending, and reporting requirements set by the Agency.
