

Family-Centered Research on Quality of Life in Families with Congenital Hyperinsulinism

We aim to develop and validate a condition-specific questionnaire to assess health-related quality of life in Congenital Hyperinsulinism (CHI).

**Interested?
Contact Us!**

What we are aiming for?

- Developing a condition-specific questionnaire assessing quality of life in patients with CHI and their caregivers

Who we are looking for?

- Children, adolescents and adults with CHI (aged 8 to 99)
- Parents/caregivers of children, adolescents and adults with CHI (aged 0 to 99)
- German, English, or Dutch language skills

What will you do?

- Participate in the telephone/online interview (approx. 45 minutes) focusing on your daily life experiences
- Compensation: €25 for a full interview

**“Your experience can improve lives
- help us understand CHI better.”**
